

5G health effects

Due to the myriad of biological and environmental variables which will play out over the course of time, it is currently impossible to calculate the extent/degree of harm 5G RF radiation will impose, or the specific timescales (latencies) involved in the potential emergence of diseases. However, it is indisputable that the existing science, when it's unedited and uncorrupted by 'chosen experts', portends serious physical impact on the public. **NO INDUSTRY OR GOVERNMENT HAS THE RIGHT TO IMPOSE THIS SORT OF RISK. SUCH AN IMPOSITION AMOUNTS TO A VIOLATION OF THE MOST BASIC HUMAN RIGHTS.**

The cart has been put before the horse. Scientific safety testing should precede deployment of 5G and be commensurate with it... as it should have been with all wireless technology.

*ANNALS OF SCIENCE, 37 (1980), 323--351 **Early Research on the Biological Effects of Microwave Radiation: 1940-1960:** '..it seems clear that the institutional structure that planned and supported research on the biological effects of microwave radiation did influence the way this field developed as a science. The internal logic of science did not dictate the course of history. ... Scientific information is, in brief, value-laden and not value-free, and it must be considered as such when it is used to make decisions about policy'.*
